Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a response to the applicant's filing on July 09, 2004 with original claims 1-29 currently presented in the instant application.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2821

2. Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

3. Claims 1 and 4-10, recitation of "energy recovery unit" are found not fully described in the specification so as this feature can be identified through drawings by its designated numerical reference while the term of "a first energy recovery unit" and "a second energy recovery unit" appeared in claim 14 mean to include different elements in while lacking of detail supported from the specification.

4. The remain dependent claims are rejected due to their virtual dependency on the defective claims 1, 4-10 and 14.

Correction made to claims 1, 4-10 and 14 would also alleviate unclearness toward dependent claims as well.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 14, recitation of "allowing a charge and/or discharge current" appeared in several places in the claims 1 and 14 cause a confusion. Since charge and

Art Unit: 2821

discharge function cannot be allowed/operated/applied at the same time. Either charge or discharge function can take place alternately or at alternate time.

7. Claims 2-13 and 15-29 are rejected due to their virtual dependency on the defective claims 1 and 14.

Correction made to claims 1 and 14 would also alleviate unclearness toward dependent claims as well.

Allowable Subject Matter

Applying prior arts or commenting a merit of allowability toward the claim invention will be provided upon a response to this office action.
